Reader should note that there may be a slight difference in year-end figures reported in current year vs. past year due to additional information received after year-end reports are published

Data based on Pannell Kerr Forster's unweighted sample, which tends to be branded properties of 30 rooms or more.

*Percentage change over same period of previous year.

**Please note that the variance between current and previous year occupancy is reported as a point change and not as a percentage variance.

Reader should note that there may be a slight difference in year-end figures reported in current year vs. past year due to additional information received after year-end reports are published

Data based on Pannell Kerr Forster's unweighted sample, which tends to be branded properties of 30 rooms or more.

*Percentage change over same period of previous year.

**Please note that the variance between current and previous year occupancy is reported as a point change and not as a percentage variance.

NOTES:

From 2004, the variance of hotel occupancy rate between current and previous year is reported as percentage point change.

Reader should note that there may be a slight difference in year-end figures reported in current year vs. past year due to additional information received after year-end reports are published.

Discrepancies are due to roundings.
