Notes:

Outbound person–visit: Refers to trip taken by one person to destinations outside of Ontario.

An **international trip** is defined by Statistics Canada as travel for less than 12 months for any reason by anybody except: immigrants, former residents, military personnel, diplomats and dependants and crews, returning to Canada who are cleared through Customs and Immigration point of entry.

Ontarians' expenditures on outbound trips: Refers to spending by Ontario residents in and outside Ontario while on a trip to a destination outside Ontario.

Expenditures on outbound trips include point of origin expenditures and the expenditures at the locations visited. The "point of origin expenditures" are the amounts of money spent by Ontario residents in Ontario on transportation before going on a trip outside Ontario, which are assumed to have taken place at the location of origin of the trip and not at the locations visited, e.g. in the case of a same–day trip, the expenditures on vehicle rental, vehicle operation and intercity transportation, while in the case of an overnight trip, they are the expenditures on vehicle rental and intercity transportation.

International travel expenditures include the following categories: Spending on Canadian fares, spending in destination countries, spending on fares of destination countries' carriers, and spending on fares of other countries.

The methodology of the International Travel Survey has changed in 2000. Therefore, data prior to 2000 are not comparable to those after 2000.
